

BusinessObjects Data Quality XI R2: Core Concepts

DM321R2

Course Description

This four-day instructor-led course is designed to give you the ability to quickly build and share business rules across the enterprise through an intuitive user interface and data quality templates. In this course, you will learn data quality concepts, use BusinessObjects™ Data Quality XI to create projects, examine and practice the concepts of matching and consolidating records, as well as using several transforms to perform operations on data such as cleansing, formatting, sorting and filtering.

The business benefit is that you, applying what you have learned in this course, will help your organization to centralize the discovery, correction, and prevention of data quality issues.

Course Audience

The target audience for this course is business users responsible for data quality functions within organizations.
